

# Envirosnack

Envirosnack concept created by Laura DeCuire  
MICHIGAN DEQ ENVIROSCAPE CURRICULUM ADDENDUM

**Target Audience: All**  
**Subjects: Science, Art**  
**Time: 1 hour**

## Procedure

1. Assemble the envirosnack by spreading frosting on a full size graham cracker.
2. Add hills as desired.
3. Sprinkle with green grassland sugar crystals.
4. Place the evergreen nonpareils to create a forest area.
5. Add blue icing to form hill country waterfalls, rivers, and lakes. (Make sure to use cake icing and not gel).
6. Add clouds according to personal preferences-perhaps surrounding the hills, creating precipitation that ends up as a lovely hill country stream. (Whipped topping could be used instead of marshmallows, but would require refrigeration.)

## Materials Required

- ◆ Chocolate graham crackers...soil
- ◆ White spreadable cake frosting...adhesive
- ◆ Chocolate kisses (2 or 3 )...Hill country
- ◆ Green sprinkles...grassland
- ◆ Green tree nonpareils (evergreen shape)...forests
- ◆ Tube of blue cake icing (no gel)...lakes and streams
- ◆ Small marshmallows or cool whip...clouds/precipitation

**NOW (EAT YOUR ENVIROSNACK AND ENJOY!)**
