

Rain in a Bag

An Imagination Station Activity

Target Audience: Elementary

Subjects: Science and Art

Time: 30 minutes or less

SUPPLIES NEEDED:

- Clear, plastic, resealable baggies -- sandwich size
- Scissors
- Permanent magic markers
- Water

Who says it only rains outside? Make your own rain! Here's how it works.

What you do:

1. Use your scissors to cut out the picture below.
2. Slide the paper inside the baggy. Trace the scene onto the baggy with permanent magic marker. It will not work with washable markers.
3. Remove the paper.
4. Fill the baggie with water to the top of the "lake" and seal it.
5. Tape the baggie to a sunny window.
6. Wait and see what happens. Make several observations about what happens and we will discuss your findings during the next class.
