Construction Project Summary

 **Job Number: 23-4005**  **City Council District 1**

SAWS is replacing aging water mains that have experienced frequent breaks. The 2023 Water Main Replacement Project 4 includes three construction sites, one of which is located on E. Hildebrand Avenue.

E Hildebrand Site: Installation will be along Hildebrand Ave and Old Hildebrand Ave from the intersection of McCullough Ave to Devine Road.

We will employ traffic control to minimize disturbances, but you may see detours and lane closures in work areas as lines are being replaced. At times, we may need to temporarily shut off water service to connect new lines to the existing system. If your service will be affected, we'll notify you in advance.

For questions regarding this project, please contact Cecilia Picazo at 210 233-3750 or Cecilia.Picazo@saws.org.

Construction Information

What happens after construction contract is awarded by Board?

- October 2026: Construction begins on Hildebrand site
- April 2027: Construction on Hildebrand site complete
- January 2027: Construction begins on Camden & Euclid site
- Street closures will occur in segments as construction progresses
- Water service interruptions will be minimized and customers will be notified in advance. Contractor will coordinate with affected customers directly.
- If concerns arise during construction, contact Contractor Liaison: Tommy Carmona
- If you feel the contractor is not addressing concerns to your satisfaction, the fastest way to get them addressed is to contact SAWS Inspector (Steven Sanchez) or SAWS External Relations (Cecilia Picazo).
