

H₂O Activities for Infants

Objectives

- Realize that water moves in a never-ending natural cycle
- Build a model of the water cycle in the form of a terrarium
- Explain how a terrarium demonstrates the water cycle

Completion Time

Various

Materials

- bubbles
- spray bottle
- spoon
- glass of water
- cups
- empty milk carton
- water balloons

Here are some easy and quick activities that you can do with infants to show them how much fun water can be.

- Hold a bubble day- blow bubbles in the yard, play with bubbles in the bath tub
- Spray the infant with water from a clean spray bottle
- Performance for baby: Use a spoon to tap glasses of water
- Fill cups of different sizes with water, pouring in and out
- Go outside, punch holes in the bottom of a milk carton and fill it with water. Watch what happens.
- Have a water balloon toss.
